I would like to request a collection **now:** Please collect:litres/drums

Please ensure that your previous collector has been advised that their service is no longer required

ISCC Self-Declaration for Points of Origin Producing Used Cooking Oil (UCO)

The UCO produced by the Point of Origin is entirely or partly of animal origin
The amount of UCO produced by the Point of Origin is 5 or more metric tons month (5435 litres)

By signing this self-declaration, the signatory acknowledges the following:

UCO refers to oil and fat of vegetable or animal origin which has been used to cook food for human consumption. Deliveries of UCO covered under this self-declaration consist entirely of UCO and are not mixed with any other oil or fat that doesn't comply with the definition of UCO.

UCO covered under this self-declaration meets the definition of a waste. This means the UCO is a material that the Point of Origin discards or intends to or is required to discard and that the UCO was not intentionally modified or contaminated to meet this definition.

Documentation of UCO quantities delivered is made available.

Applicable national legislation regarding waste prevention and management is complied with

Auditors from certification bodies or from ISCC can examine, with or without prior announcement, on-site or by contacting the signatory, whether the relevant requirements of ISCC EU are complied with and the statements made in this self-declaration are correct.

The information on this self-declaration may be forwarded by the Collecting Point to and reviewed by the certification body of the Collecting Point and by ISCC.

If audits of certification bodies or ISCC reveal that relevant ISCC requirements are not complied with or declarations made in this self-declaration are not correct, and if the Point of Origin is thereupon excluded as supplier of ISCC certified material. ISCC is entitled to publish the exclusion of the Point of Origin on the ISCC website.
